

NADY 141 VR

Wireless Microphone System for Camcorders

A Breakthrough in Performance and Affordability

The Best Value in Wireless Audio for Camcorders

The latest innovation in price and performance for video enthusiasts and home videographers, the new Nady 141 VR is a remarkable achievement in wireless audio technology—the most affordable high performance wireless microphone system on the market.

LT-1*

And whether you use the standard Nady LT-1 lavalier microphone or the HT-1 handheld mic transmitter with your 141 receiver, you'll get Nady's renowned sound quality at an exceptionally low price.

The Nady 141 VR system allows you the freedom and mobility only wireless can provide. Now you can

catch the action and record it unencumbered—making it ideal for event videographers, home users or anyone looking for high performance wireless audio. With its versatile design, the 141 VR receiver can be attached to your camcorder in seconds or worn as a bodypack. Range is up to 150 feet or more. And because you can now place the microphone anywhere in the camcorder's potential field of vision, even your home videos can now have the sound of a professional production.

The Power of Wireless

By allowing you to position the microphone at the sound source instead of on the camcorder, the Nady 141 VR wireless eliminates potential camera noises as well as undesired ambient sounds between the camcorder and the action. You get the true clarity of sound only a microphone at the source can provide, without the cluttered noises typically found with camcorder mount microphones. In addition, the Nady 141 VR's advanced companding noise reduction feature eliminates background hiss and overload distortion commonly found in most competitive units. Combining the advantages of wireless with Nady's refined audio capabilities, the Nady 141 VR is the best and most affordable audio choice available to optimize the power of wireless in your videography.

The Best Selling Wireless in the World

With over a million systems sold, Nady is the number one selling wireless in the world. Over twenty years ago, Nady introduced high quality wireless audio transmission with patented companding circuitry. For this revolutionary development, Nady received a 1996 Emmy Award for Outstanding Technical Achievement. Now, with the 141 VR, Nady continues its wireless tradition of providing the cleanest and clearest natural sound available in wireless for camcorder microphones.

HT-1*

141 VR SYSTEM SPECIFICATIONS

OVERALL SYSTEM PERFORMANCE

Frequency Response: 40-12,000 Hz, ± 3 dB
Dynamic Range: >100 dB
Total Harmonic Distortion: < 1.5%
RF Carrier Frequencies: Selected frequencies between 81 and 88 MHz
Modulation: FM ± 15 KHz
Operation Range: 150 feet, typically; up to 500 feet line-of-sight

NADY HT-1/LT-1 VHF TRANSMITTERS

Audio Input Impedance: HT-1 (Handheld): Optimally matched to a Nady dynamic mic element or other element used. LT-1 (Lavalier): 600 ohm electret condenser microphone permanently attached
Controls: All Transmitters: Transmitter OFF/MUTE/ON and Input Level Adjust. Handheld HT-1: Audio ON/OFF; Transmitter "TX" ON/OFF
Indicator: Low battery LED
RF Power Out: 50 mW max. (maximum allowed by FCC)

Harmonic and Spurious Emissions: < -40 dBc

Battery: 9V alkaline
Battery Life: 16-20 hours
Bodypack Dimensions: 3.8" x 2.4" x 0.8"; 9.65 cm x 6.1 cm x 2.0 cm
Bodypack Weight: 2.5 oz.; 70 grams

NADY 141 VR RECEIVER

Controls: Power ON/OFF, Headphone Volume Control
Audio Output: 2.5 mm micro-jack, mic level
Headphone Output: 3.5 mm mini-jack
Indicators: Power "ON" and Transmitter "TX"
Mute: 7 μ V factory preset minimum
Image Rejection: 60 dB image and spurious
Battery: 9V alkaline
Battery Life: 10 hours
Size: 2 1/2" x 4 1/2" x 1"; 6.3 cm x 11.6 cm x 2.5 cm
Weight: With Battery: 4 oz./110 grams, Without Battery: 5.3 oz./150 grams
